Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 8-9 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 8, line 5, the number "5" should be deleted.

In claim 14, line 1, the recitation "can be read" is vague and indefinite because it is not positively clear whether that the recording medium can be read by the computer. Corrections and/or clarification is required.

2. Claims 11-14 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. Evidence that claims 11-14 fail(s) to correspond in scope with that which applicant(s) regard as the invention can be found in the reply filed 12/14/0-6. In that paper, applicant has stated that "the examiner has failed to appreciate that in the present claimed invention, the level bias voltage that is added or applied to the preamplifier circuit is changed depending on whether the video signal is related to a still image or to a moving image" , and this statement indicates that the invention is different from what is defined in the claim(s) because the noted claims 11-14 do not specify that the level of the bias voltage applied to the preamplifier circuit is changed in accordance with the video signal that is either a video signal related to a still image or a video signal related to a moving image. Thus, the noted claims are incomplete.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 10-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Fujiyoshi(6,211,854B1).

Fujiyoshi discloses a computer for displaying images on a screen of a display device comprising a video detection means(11), a transmission portion(6-9, 12-13), a table(15) and a display(5) which all function as claimed.

5. Claims 2-7 and 10 are allowed.

6. Applicant's arguments with respect to claims 8-9 and 11-14 have been considered but are moot in view of the new ground(s) of rejection.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yoon, Motonakano et al and Kim are made of record to show various types of adding a bias voltage to a preamplifier circuit of a display driving device.
